Creamos una cuenta en github, en el caso del equipo ya lo teníamos.

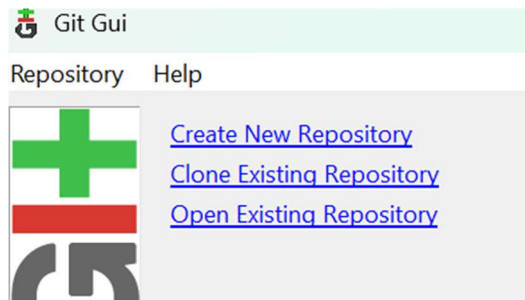

Igualmente instalamos Git en la pagina de <https://git-scm.com/>

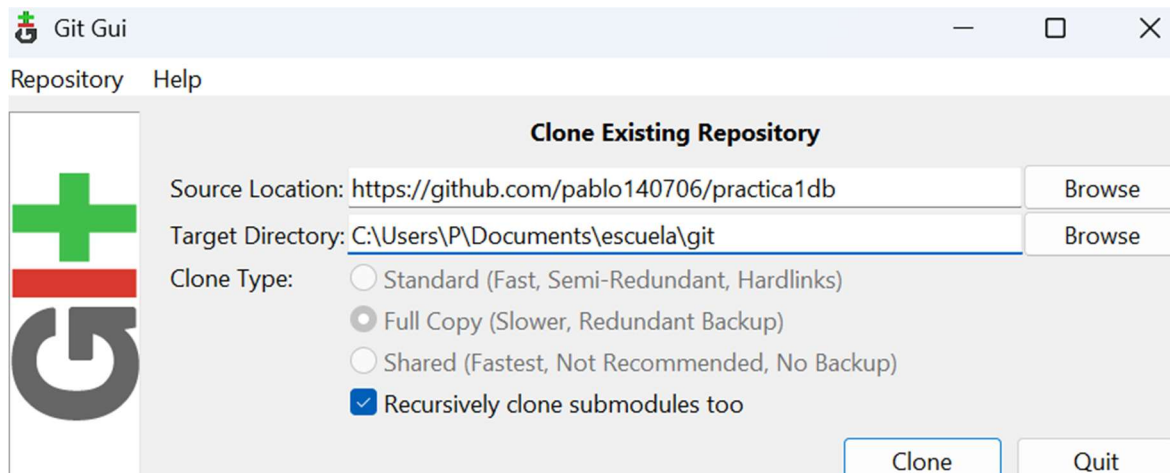

En github creamos el repositorio

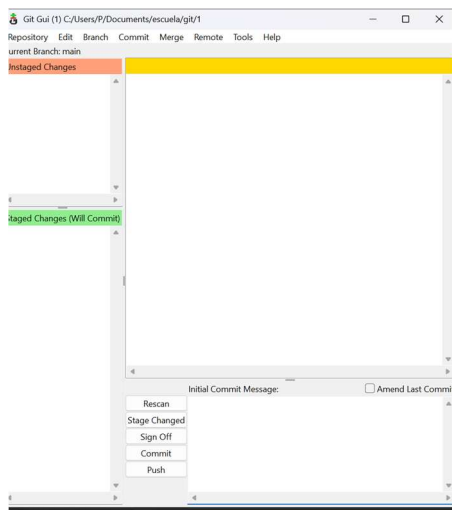

Ahora abrimos git en este caso igual ya se tenia instalado

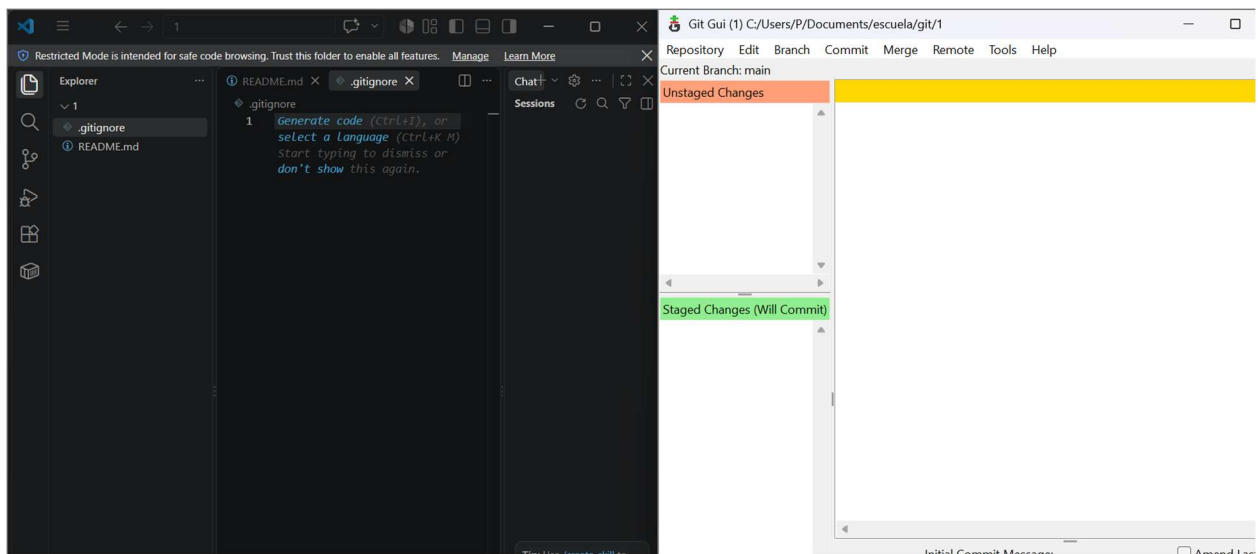

Le damos en git clone

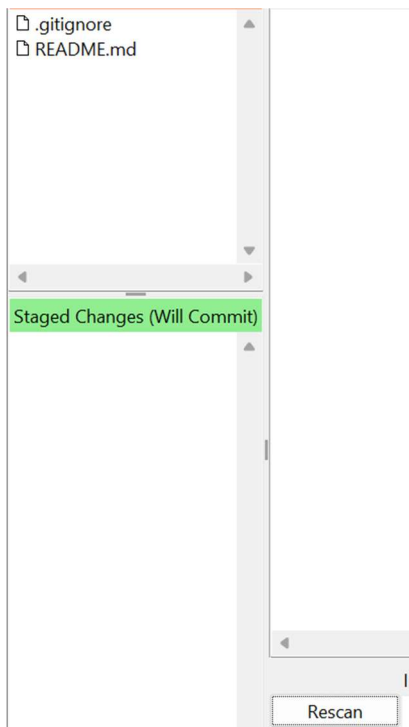

Vemos el menú

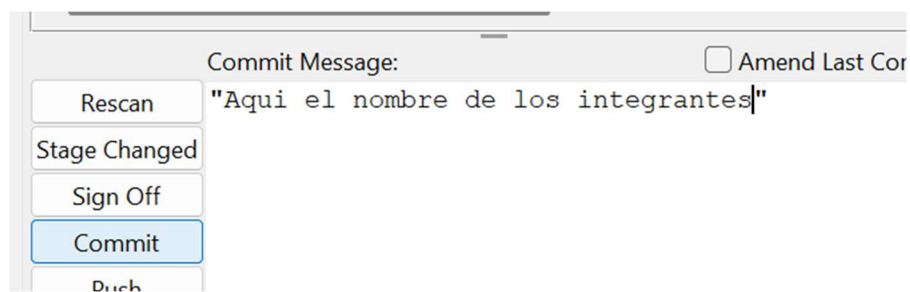

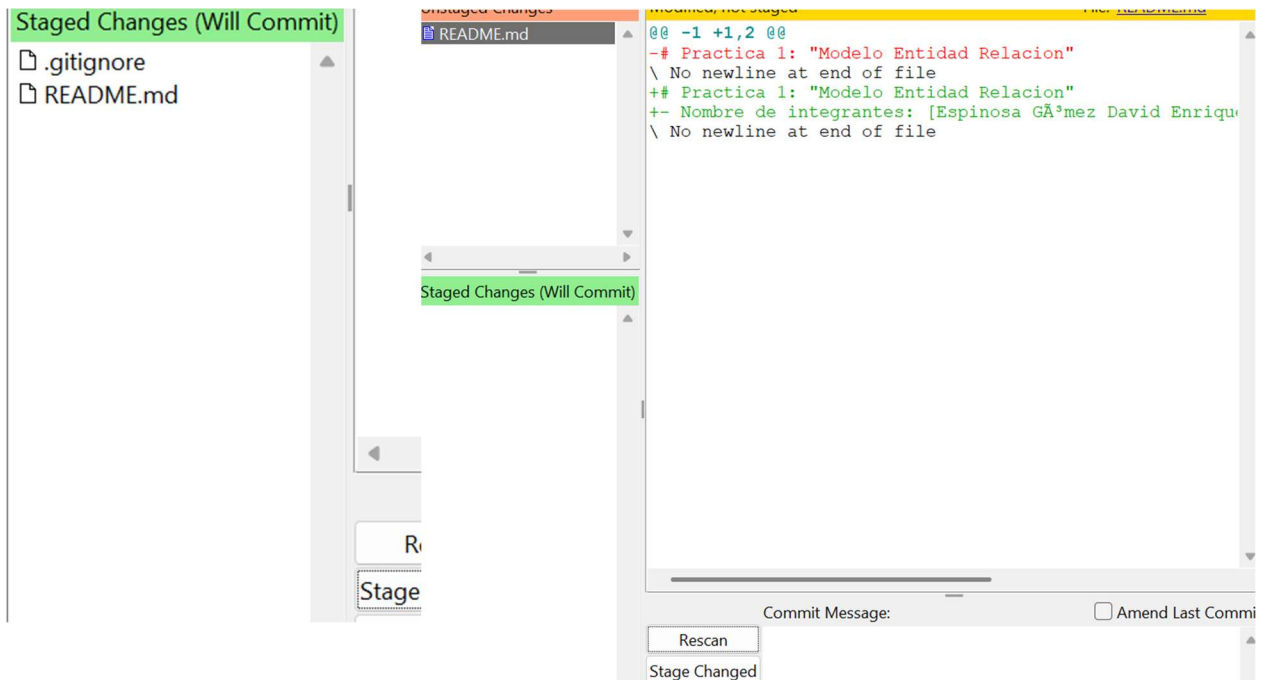

Creamos el archivo README.md y el .gitignore

Le damos en rescan

Luego en state changed para hacer los commits

Aquí vemos los commits que realizamos
